

BIND

Brain Involvement
in Dystrophinopathies

Why we do this study?

To better understand how Duchenne Muscular Dystrophy (DMD) and Becker Muscular Dystrophy (BMD) impacts mental health and how to assess it.

What will you have to do?

Complete four online questionnaires about development and behaviour.

We need you for our study!

Participation can take place in only one of our two UK participating sites

If your child is a boy with genetically proven diagnosis of DMD or BMD aged between 5 and 17 years (contact UCL or Newcastle site)

or

If you are an adult male with genetically proven diagnosis of BMD aged between 18 and 50 years (contact Newcastle site only)

Interested in joining the UCL site?

Email: andriani.papageorgiou.14@ucl.ac.uk
or i.vainieri@ucl.ac.uk

Telephone: 020 3987 2199 / 2684

Interested in joining the Newcastle site?

Email: monika.malinova@newcastle.ac.uk

Telephone: 0191 241 8649
